

ESR 1

Khelvi Biriukova (Russia)
*University of Milano-Bicocca,
Italy*

Collected multi-angular fluorescence (SIF) and reflectance datasets in Mediterranean tree-grass ecosystem over the herbaceous stratum in Las Majadas de Tiétar, Spain and over alfalfa and chickpea crops in Grosseto, Italy.

She presented the results of the first campaign in Las Majadas at EGU, Vienna, Austria.

ESR 2

Javier Blanco (Spain)
*University of Milano-Bicocca,
Italy*

Delivered an oral presentation at EGU, Vienna, Austria.

He has organized all the data collected during his field campaign in Aranjuez (Spain).

ESR 3

Dominic Fawcett (Switzerland)
*University of Exeter,
UK*

Received accreditation of his skills for the operation of drones for commercial work in the UK.

Started his secondment at UNIMIB where he is taking part in multiple field campaigns.

ESR 4

David Martini (Italy)
*Max Planck Institute for Biogeochemistry,
Germany*

Presented results at IGARSS, Valencia, Spain.

Participated in two field campaigns in Majadas: for HYPLANT and APEX flights.

ESR 5

Daniel Pabón (Colombia)

*Max Planck Institute for Biogeochemistry,
Germany*

Preparing a manuscript about Gross Primary Production; to be submitted in August.

ESR 6

Vicente Burchard-Levine (Canada)

*Spanish National Research Council,
Spain*

Gave oral presentation at the 4th Remote Sensing and Hydrology Symposium (RSHS'18) held in Cordoba, Spain.

Participated in numerous field campaigns in Majadas including for HYPLANT and APEX flights.

ESR 7

Vikas Pingle (India)

*Jülich Research Centre,
Germany*

Unfortunately, Vikas Pingle left the project for personal reasons.

The TRUSTEE team wishes him all the best and hopes to see him back to research soon.

ESR 8

Egor Prikaziuk (Russia)

*University of Twente,
Netherlands*

Attended the First European Congress on Photosynthesis Research, ePS-1 in Uppsala, presenting data from the secondment in Jülich.

He gathered data of Sentinel-3 over Majadas and started doing atmospheric corrections upon it.

ESR 9
Hafiz Ali Imran (Pakistan)
*Edmund Mach Foundation,
Italy*

Completed his secondment at CSIC, Spain devoted to the Radiative Transfer Modelling.

Started to setup field experiment to investigate the optical properties and biodiversity of the grasslands in Italian Alps (Monte Bondone).

ESR 10
Georgios Ntakos (Greece)
*Aerovision,
Netherlands*

Started his field measurements of potato plants with a hyperspectral camera on drone.

He is trying to combine crop growth model WOFOST with the SCOPE model.

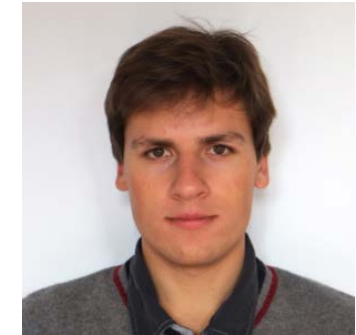

ESR 11
Laura Paladini (Italy)
*Vito,
Belgium*

Collected field data for the monitoring of flowering intensity in pear orchards.

Finalized the data processing for the analysis of senescence in pear orchards.

Started working on a unified protocol for UAV data acquisition.

ESR 12
Anton Evdokimov (Russia)
*University of Milano-Bicocca,
Italy*

Has developed, validated and implemented an automated parallelized Sentinel 2 processing pipeline from tile download, through atmospheric correction with sen2cor to vegetation index calculation and data visualization.

Made a poster presentation at the EO4ALPS conference in Innsbruck, Austria.
